

CUSTOM COATING SERVICES

Providing solutions for custom and specialty coatings

CUSTOM COATING SERVICES

With two plants geographically located in Texas and California, Aegion Coating Services has the ability to internally and externally coat various sizes and shapes of pipes, bends, valves and other fabrications with fusion bond epoxy (FBE), epoxies and urethanes. With over 1,600 projects completed annually, our services include:

- Coating application for pipes, bends, fabrications, valves and spool pieces in various shapes and sizes
- ID and OD applications using FBE, epoxies and urethanes
- Facilities in the United States, including Texas, California and Oklahoma
- Portable plants available throughout the world

Products

We use a variety of well-known brands for our coatings applications.
