

As exploration and production activities move into more challenging frontiers such as deepwater, arctic and unconventional onshore environments, Aegion's team of asset protection specialists continue to provide advanced field joint and custom coating solutions for:

- Deepwater, high pressure and high temperature environments
- Integrated line pipe - field joint coating and subsea equipment coating
- Extreme cold - arctic environments

Strategically headquartered in Greater Houston, Aegion Coating Services has coated over three million field joints in the Americas, Europe, Africa, the Middle East and Asia Pacific. Our advanced mobile coating technology provides internal and external protection for vital energy, water and mining infrastructure needs.

PARTIAL LIST OF COMPLETED PROJECTS

Phillips 66 Tetney Sealine

Coating: Internal and external liquid
Year: 2015

Saudi Aramco Wasit

Coating: Internal liquid coating
Year: 2013

Petrobras Ubarana

Coating: Internal and external FBE
Year: 2013

Williams Rockaway Lateral

Coating: FBE, ARO, CWC infill
Year: 2014

Helix Phoenix Ph II

Coating: IMPU insulation
Year: 2013

Shell Bakersfield

Coating: 3LPP
Year: 2013, 2015

An ISO 9001:2008 Certified Company
